\*Installation materials for up to 3 inlets. Depending on floor plan additional installation materials may need to be purchased.

**EUREKA**  
Invented for the way you clean.

## Powerful cleaning. Thorough cleaning.

A Eureka Central Vacuum System is up to five times more powerful than many uprights—so you can clean thoroughly and completely, with less effort. You can clean carpet, wood, ceramic tile and other hard surfaces. Versatile attachments make cleaning upholstery, draperies, even delicate fabrics like lamp shades, practically effortless.

## Improved indoor air quality for your family.

Ordinary vacuums can recirculate dust and allergens in your home. A Eureka system removes 100% of contacted dirt, dust, dust mites, pollen, animal dander and other allergens. It carries them out of living areas and deposits them in the power unit collection receptacle.

**CV5500 Power Unit**  
Powerful enough for homes up to 6,500 sq. ft., (install kit designed for homes up to 2,100 sq. ft.) 8-gallon translucent dirt receptacle with optional paper bag, 550 air watts, external muffler, vents inside or out.

## Eureka Excellence

- an electric power brush that automatically adjusts to carpet height
