

Sanitaire®

The Ultimate Time Machine™

In an industry when time is spelled out in man-hours, Sanitaire™ has created a backpack that users will wear longer and clean further than ever before. **THIS IS THE ULTIMATE TIME MACHINE.**

LOAD DISPERSION TECHNOLOGY™ MEANS LESS USER FATIGUE. Results from the field test survey:

** "I believe these backpack vacuums are an improvement on efficiency and this one's comfort level with the padded harness is great!"*

MORE HEAT ABATEMENT – The superb new harness keeps the machine and exhaust away from the user's back meaning more wear time and a more comfortable experience. Field testing survey reports: ** "Very comfortable, good padding."*

IN A WORD QUIET – 69db. A quieter machine increases productivity when used as part of the Team Cleaning process. ** "The SC535A is quieter than the well known competitor models that we use now."*

TOOLS COME STANDARD - Six Tools come with the 10Q. No additional purchase necessary.

FILTRATION – Choice of SC530 (Micron Filter) or SC535 (HEPA filter). Both contain a standard sized, 10 quart, disposable dust bag.

WEIGHT – With the harness, the 10Q weighs only 11.5 lbs. Less than similarly equipped competitive models.

POWER AND PERFORMANCE – Powered by a quiet 11.5 amp motor, the 10Q is rated at 120 CFM and has a cleaning past of 14 in. ** "Meets the standard and is very good."*

*Quotes are from an actual field test with customers who had used another brand. The data was not only overwhelmingly positive but resulted in the placement of a significant order for the 10Q to replace the current competitor's model.

INTRODUCING

THE NEW SC530 & SC535 10Q QUIET CLEAN TIME MACHINE

The Most Comfortable and Quietest
Backpack Sanitaire Has Ever Built
